

SQUAW VALLEY PUBLIC SERVICE DISTRICT

Liquidation of Surplus Property

DATE: September 11, 2017, 2017

TO: SVPSD Board of Directors

FROM: Allen Riley, Fire Chief

SUBJECT: Surplus property

BACKGROUND: The Fire and Operations Departments have an asset replacement program that funds the replacement of equipment and apparatus according to anticipated service life and/or industry guidelines. At present, the Departments have some equipment that has been taken out of service, but may still have some value. District code requires that the Board declare this asset to be surplus to our needs before it can be liquidated in any manner.

DISCUSSION: The surplus equipment includes a Compressed Air Foam Unit (CAFS), various radio equipment, emergency lights, surplus hand tools, extrication power unit and tools, a PPV fan, 2 electric chain saws, camera equipment, and some office chairs. The CAFS unit is 17 years old, been out of service for approximately 8 years, and in need of maintenance and repair. Truckee Fire has interest in putting in the required maintenance and replacement of outdated parts for use at the Truckee Airport. The CAFS unit would be available, by mutual aid, in the event that we had a need.

ALTERNATIVES: 1. Determine that the equipment is surplus to the District's needs and authorize the Fire Chief to sell, donate or dispose of it in some other manner.
2. Take no action.

FISCAL/RESOURCE IMPACTS: None - the storage space in the engine bay.

RECOMMENDATION: Staff recommends Alternative #1 as described above.

ATTACHMENTS: List of Surplus Property

DATE PREPARED: September 11, 2017
